WASHINGTON: 1977

FOREWORD

THIS REPORT continues the release of Medicare enrollment figures begun with data for 1966. The number of persons insured under the two parts of the Medicare program are shown primarily for July 1, 1974, by age, race, sex, and place of residence. Monthly terminations and new enrollments are also shown. Selected data are included for enrollment since the program began. The figures will provide the population base for rates of utilization of medical services covered under the program that are published in other reports of the Medicare series.

The report presents information on the characteristics and geographic distribution of disability beneficiaries under age 65 covered by Medicare. The Social Security Amendments of 1972 (Public Law 92–603) extended Medicare coverage to the disabled effective July 1, 1973.

This series is prepared by the Division of Health Insurance Studies under the supervision of Clifton R. Gaus, division director, and Carl Josephson, assistant director of the Program Statistics Branch. The text analysis and data presentation in this report are the responsibility of James M. Hatten, with assistance from Verna J. Tyler, Program Statistics Branch, for computation and verification of the data. Important contributions for the tabulation and presentation of the statistical content were made by Robert Dickerson and Robert J. Butler. Computer services were provided by the Division of Health Insurance Statistical Data, Bureau of Data Processing. The general tables were produced by the System for Automated Tabular Composition, a computer system at the Social Security Administration headquarters. They were photo typeset on Linotron equipment at the Government Printing Office.

John J. Carroll,
Assistant Commissioner for Research and Statistics.

THE STATISTICAL SYSTEM OF THE MEDICARE PROGRAM

THIS PUBLICATION is a section of a series of statistical reports produced from Medicare program records. Data are presented on a calendar-year basis, describing services rendered in the year. The series includes sections on the number and characteristics of enrollees; on the characteristics of participating providers; on inpatient care in hospitals, and overall summaries.

The primary objective of these reports is to provide data to measure and evaluate program operation and effectiveness. Benefit payment operations furnish information about the amount and kind of hospital and medical care services used by disabled persons and persons aged 65 and over, as well as the expenditures for such services. The applications by hospitals, skilled nursing facilities, home health agencies, independent laboratories, and suppliers of portable X-ray and outpatient physical therapy services to participate in the program provide data on the characteristics of such providers of services. The claim number assigned to each individual serves as the link between the services utilized under Medicare and the demographic characteristics of individual enrollees.

The data collection system has two inherent characteristics that determine the scope, detail, and flexibility of the availabile statistics. First, the beneficiary and his medical experience under the program form the basic unit for which data are collected. Second, records for each bill paid under the program and records of diagnoses and surgical procedures for a sample of beneficiaries are maintained on a centralized basis. Except for intermediary operating statistics such as those relating to workloads, costs, and the like, all program statistics are prepared centrally.

THE BASIC RECORDS

The statistical system is based on four related computer records: the health insurance master file, provider record, hospital insurance (Part A) utilization record, and the medical insurance (Part B) payment record.

The Health Insurance Master File

The health insurance master file identifies each aged and disabled person eligible for health insurance benefits and indicates whether he is entitled to hospital insurance benefits, to supplementary medical insurance benefits, or to both.

This record is used to create a health insurance card that is sent to each insured person. The card contains the individuals' claim number (the number used for OASDI or railroad retirement programs). It indicates the entitlement of the individual for each of the two parts of the Medicare program.

The entitlement record provides the population data for each part of the program which serves as the base for the computation of a variety of utilization rates, limited only by its demographic content.

Provider Record

Every hospital, home health agency, skilled nursing facility, independent clinical laboratory, and supplier of portable X-ray or outpatient physical therapy services must apply for participation in the Medicare program. Data on the application forms are stored in the central provider record and are updated as facilities are recertified periodically, as new ones apply for participation, or as some leave the program. When the information in this provider file is combined with utilization data, it serves to relate the characteristics of facilities and agencies that provide care to the kinds and amounts of service used by persons insured under Medicare.

Utilization Record for Hospital Insurance

The administration of the hospital insurance (HI) program requires that two items of information be known about each person at the time of his admission to a hospital—his entitlement under the program and the extent to which he has used the benefits available to him.

When the patient is admitted to a hospital, the admission section of the inpatient hospital admission and billing form is completed by the hospital and forwarded through its intermediary to the Social Security Administration's central record. As soon as the record is checked, normally in less than 24 hours, the intermediary is informed of the patient's benefit status and of the number of days of inpatient care to which he is entitled during his current benefit period.

This information is then forwarded to the hospital. At discharge, the hospital completes the billing section of the form and sends it to the intermediary for payment. When payment is approved, the intermediary forwards the claim to the Social Security Administration for inclusion in the central record.

As part of this process information on diagnoses and surgical procedures is coded for a 20-percent sample of beneficiaries based on specific combinations of digits in the health insurance claim number. Admission and billing forms are handled in a comparable manner by home health agencies and skilled nursing facilities. The outpatient billing form is also transmitted to the Social Security Administration for entry in the central record after the bill is approved for payment by the intermediary.

All the information on utilization experience in hospital and skilled nursing facilities that is needed to administer the "benefit period" provision is recorded centrally. This information includes stays in certain nonparticipating institutions that meet the definition of a hospital or skilled nursing facility under the law, and days of care not covered or reimbursable under the program.

Each admission and billing form contains both the beneficiary's claim number and the provider's identification number. The resulting record can be readily matched to the beneficiary files and the provider files. By this process. a statistical tape record is created for the sample of insured persons that contains all the available information needed for tabulation from the three files related to HI utilization.

Payment Record for Medical Insurance

Payment or reimbursement under the SMI program is made only after receipt by the carriers (intermediaries involved in Part B of the Medicare program) of bills with allowed charges in excess of $60 during a calendar year.

For the enrolled population, carriers need to know from a central source the amount of the deductible that has been met; thereafter, during the remainder of the calendar year, the only additional information required from the Social Security Administration for reimbursement or payment purposes is whether the person is still enrolled under the SMI program.

For administration and operation of the program, the Social Security Administration must have accurate and complete information on the amounts paid by the carriers for physician services and for other services and supplies under this part of the program. To meet these needs, carriers furnish a payment record consisting of tape, punched card or other machine-readable form of each bill paid. A bill is defined as a request for payment from or on behalf of a beneficiary as the result of services provided by a single physician or supplier.

CHARACTERISTICS OF THE TOTAL ENROLLED POPULATION, 1974

ON JULY 1, 1974, 24.2 million persons were insured under Medicare. Those aged 65 and over numbered 22.3 million while the remainder were disability beneficiaries less than 65 years old. Disability beneficiaries became eligible for Medicare under the Social Security Amendments of 1972 (Public Law 92–603). The amendments extended Medicare coverage, effective July 1, 1973, to persons below age 65 entitled to cash benefiits under the social security or railroad retirement programs because of disability. Coverage is limited to beneficiaries who are entitled to disability benefits for at least 24 consecutive months or who had end-stage renal disease.

About 22.9 million aged and disabled persons were covered by both hospital (HI) and supplementary medical insurance (SMI). Another 1.0 million persons were enrolled only for HI benefits, and over 250,000 for SMI benefits only. (Persons under 65 years are not eligible for SMI coverage only.) The enrollment of the aged and disabled by type of coverage was:

Type of coverage	Enrollment (in thousands)		
	Total	65 years and over	Under 65 years
Hospital insurance and/or supplementary medical insurance	24,201	22,273	1,928
Hospital insurance	23,924	21,996	1,928
Supplementary medical insurance	23,167	21,422	1,745
Hospital insurance and supplementary medical insurance	22,890	21,145	1,745
Hospital insurance only	1,034	851	183
Supplementary medical insurance only	277	277	—

This report presents data on the characteristics of the aged and disabled population in the Medicare program during 1974, and discusses changes in enrollment of the aged since the start of the program on July 1, 1966. The general tables present separate data for aged and disabled enrollees by type of coverage, age, race, sex, and State of residence. In addition, table 2.1 shows combined aged and disabled enrollment by type of entitlement and State of residence. Included with all disability beneficiaries are persons eligible solely because of end-stage renal disease. The counts of enrollees are as of July 1, 1974, and provide a population base for measuring utilization of medical care services under the Medicare program. Also included are tables showing enrollment by month, and the total number of persons enrolled at any time during 1974.

During 1966–74, HI enrollment among the aged increased 15.2 percent (from 19.1 million to 22.0 million), reflecting the growth of the population aged 65 and over (table A). Almost every aged person is eligible for HI without paying a premium, but enrollment in the SMI program is voluntary and requires the payment of a premium.[1] There were 21.4 million aged SMI enrollees on July 1, 1974, or 20.8 percent more than when the program began. The number of persons 65 years and over entitled only to HI benefits decreased in 1974 to a record low of 851,000. The decline was caused by the large number of persons who elected SMI coverage during the general enrollment period (GEP) that ran from January through March 1974, with coverage beginning July 1, 1974. SMI enrollment was stimulated during this GEP because the 3-year limit for SMI enrollment had been removed by the 1972 amendments (see Provisions of the Law).

For purposes of analysis and to maintain historical continuity, enrollment data by State of residence will continue to be shown by census region and division, in addition to standard Federal Administrative regions (table B).

HI ENROLLMENT OF THE AGED

Type of Entitlement

About 94 percent of the persons entitled to HI benefits were receiving or were eligible for social security benefits (table C), and 4 percent were receiving or were entitled to railroad retirement benefits. Some 296,000 persons were entitled to both social security and railroad retirement cash benefits because of earnings under both programs. These persons are reported both as entitled to social security benefits and as entitled to railroad retirement benefits, but are counted only once in the figures in table C for all enrolled persons. The remaining enrolled population (4 percent) were not entitled to receive cash benefits under either social security or railroad retirement, and are classified as "other enrolled persons." This group is entitled to HI coverage under a transitional provision of the law. Under this provision, persons attaining age 65 need not be fully insured for social security but must have a specified number of quarters of covered employment to be eligible for HI.

For persons who attained age 65 before 1968, no quarters of coverage were required. For those becoming 65 in 1968 and later years, the following quarters of coverage are required: in 1968, 3 quarters; in 1969, 6; in 1970, 9; in 1971, 12; in 1972, 15; in 1973, 18. Men atttaining age 65 in 1974 must have 21 quarters of coverage and women 20. In 1974

[1] For estimates of the number of aged not covered by Medicare, see U.S. Bureau of the Census, *Census of Population and Housing: 1970 Evaluation and Research Program* PHC(E)–4, "Estimates of Coverage of Population by Sex, Race, and Age: Demographic Analyses" (Washington, D.C.: U.S. Government Printing Office, 1973).

TABLE A.—Medicare enrollment of persons 65 years and over and annual percent change by type of coverage, July 1, 1966–74

Type of coverage	1966	1967	1968	1969	1970	1971	1972	1973	1974

for women and 1975 for men, the HI transitional provision will no longer apply since the same number of quarters of coverage will be required for entitlement to cash retirement benefits and HI benefits.

The number of "other enrolled persons" steadily declined from 1.5 million on July 1, 1967, to 800 thousand by July 1, 1974, primarily because deaths exceeded new enrollments in this group. Thus, the number of new enrollments (aged 65–66) fell from 122,000 in 1968 to 9,000 in 1974, reflecting the greater number of work credits required each year beginning with those who attained age 65 in 1968.

Except for the proportion of persons with race not reported, there were only minor differences between the characteristics of railroad retirement beneficiaries and social security beneficiaries (table C). Race was not reported for 31 percent of the railroad retirement beneficiaries in contrast to 1 percent for social security beneficiaries. Persons classified as "other enrolled," however, had relatively high proportions of women (73 percent), persons 80 years and over (38 percent), and minority race members (19 percent).

Age, Race, Sex

There were more women enrolled in HI than men at every age, and the ratio of women to men increased with advancing age because of their greater longevity (table C). A secondary factor is the declining proportion of foreign born in the population 65 years and over. Most immigrants who came to the United States in the 1880's to the 1920's were men and those surviving are mainly 65 years of age and over.[2] At ages 65–66, 54 percent of the HI population were women. This proportion rose to 68 percent at ages 85 and over. The rising proportion of women to men with advancing age was similar for both the white population and among those of all other races.

The median age of the white population was slightly higher (0.5 year) than that for all other races. The median age of women was 1.3 years above that of men. By race, 89 percent of the enrolled population was classified as white and 8 percent as members of all other races; race was not reported for 3 percent of enrollees.

Race and sex	Aged persons enrolled in HI (in thousands)	Percent	Median age (in years)
Total HI enrollees	21,996	100.0	73.1
Men	9,005	40.9	72.4
Women	12,991	59.1	73.7
White	19,601	89.1	73.2
Men	8,007	36.4	72.5
Women	11,595	52.7	73.7
All other races	1,809	8.2	72.7
Men	796	3.6	72.1
Women	1,013	4.6	73.2
Race unknown	586	2.7	73.7
Men	203	.9	71.1
Women	384	1.7	75.8

Geographic Distribution

As shown in table D, the largest proportion of the HI population lived in the South (31 percent), and the smallest in the West (16 percent), By division, the greatest proportion of the HI population resided in the Middle Atlantic and the East North Central States, with each having nearly 19 percent of all HI enrollees. The Mountain States had the smallest percentage of HI enrollees (less than 4 percent). The same distribution held for the white population, but for persons of all other races, 57 percent lived in the South.

Excluding the South, the proportion of whites exceeded 90 percent of total HI enrollees in all geographic divisions. In the three divisions of the South, the white population represented 79 to 84 percent of HI enrollees.

West	100.0	71.3	6.1	22.0
Mountain	100.0	49.4	4.7	45.0
Pacific	100.0	78.0	6.6	14.9

The proportion of those living in metropolitan counties showed much variation by geographic area. The South had the lowest proportion of enrollees, 58 percent, living in metropolitan counties while the Northeast was highest with 83 percent. Nearly three-fourths of the HI enrollees who lived in a metropolitan county resided in the standard metropolitan statistical areas having a 1970 population of 500,000 or more (table 2.4).

SMI ENROLLMENT OF THE AGED

Age, Race, and Sex

The distribution of persons enrolled under the HI and the SMI program differed little by age, race, sex, and median age. This is to be expected since the proportion of HI enrollees also participating in SMI was over 96 percent (table E).

The largest difference in the proportion of the aged HI population also enrolled in SMI was between races. For the white population, 97 percent of the persons enrolled for HI were also enrolled for SMI, 5 percentage points more than for all other races. The higher rate for whites persisted in every age and sex group and was greatest, 7 percentage points, by 2-year age groups for those aged 65 and 66, and 7 percentage points by 5-year age groups for those aged 85 and over. The percentage of HI enrollees also covered by SMI varied slightly by sex. The participation of women was greater than men by about one percentage point. For 2-year age groups between 65 and 75. the lowest proportion was recorded for men at ages 65 and 66. It is likelv that many men on attaining age 65 do not enroll for SMI because they continue to work and are still protected by employment-related medical insurance. By 5-year groups the lowest and highest participation rates differed by less than 2 percentage points.

TABLE E.—Percent of persons 65 years and over in the hospital insurance program participating in the medical insurance program, by age, race, and sex, July 1, 1974

Race and sex	Age 65 and over	65, 66	67, 68	69, 70	71, 72	73, 74	65-69	70-74	75-79	80-84	85 and over

Geographic Distribution

On July 1, 1974, among HI enrollees residing in the United States, over 97 percent were also enrolled in SMI (table F), or 1 percentage point higher than for persons of all areas covered by HI (table E). The lower rate among the total population resulted from the inclusion of two groups of SMI-eligible persons with low participation residing in outlying areas, such as Puerto Rico (see table 2.1) and in foreign countries. Medicare benefits are not ordinarily paid for services provided in foreign countries. In the outlying areas the average SMI participation rate was 55 percent. Such factors as lower income and differing arrangements for medical care in these areas probably account for the lower enrollment.

For all persons in the United States, the proportion of HI enrollees with SMI coverage varied slightly more than 1 percentage point among the geographic divisions, from 96.6 percent in the West South Central States to 97.8 percent in the New England States. The difference in participation rates by race varied slightly among geographic divisions (2 to less than 7 percentage points) except for those in the Mountain States. There the proportion of minority race members enrolled for SMI was 9 percentage points lower than that for whites. This may reflect the relatively large proportion of American Indians in the area who receive free care.

AGED PERSONS NEWLY ENROLLED AND TERMINATED IN 1974

Nearly 1.6 million aged persons were newly enrolled under HI during 1974 (table G), an average of 132,500 a month. Nearly all additions to the rolls were persons who had just attained age 65. Also, the provisions of the law for HI coverage permit additions to the rolls at older ages. If a person files his application after he attains age 65, his HI protection can be retroactive for up to 12 months prior to the date he filed his application. HI enrollment of persons over 65 years of age resulted primarily from the intitial enrollment of premium-HI eligibles effective July 1, 1973. Additions to the SMI program totaled 1.7 million persons, exceeding the number of those newly enrolled for HI by 131,000 persons. Additions to the SMI rolls were higher than for HI as a result of three factors: the general enrollment period, the State buy-in program, and the enrollment of persons in SMI who are ineligible for HI coverage.

The General Enrollment Period

Persons who fail to enroll during their initial enrollment period are given additional opportunities to do so during the annual general enrollment periods. In the general enrollment period (GEP) which ran from January 1, 1974 to April 1, 1974, nearly 410,000 persons were identified as eligible to enroll. An estimated 135,000 chose to do so with enrollment taking effect on July 1, 1974.

The premium paid by persons enrolling for SMI was $6.70 a month on July 1, 1974. In addition, the monthly premium of persons who do not sign up in their initial enrollment period is increased by 10 percent for each full 12 months in which they could have but did not enroll. The increase also applied to persons re-enrolling 12 or more months after their first coverage was terminated.

SMI Only Enrollees

There were 277,000 persons on July 1, 1974, who lacked the required work credits for HI eligibility, an increase of 33,000 persons since July 1, 1973. Some 28,000 of them were active or retired Federal employees insured under the Federal Health Benefits Act of 1959. As expected, enrollees eligible only for SMI differed considerably from those protected by both parts of Medicare. Thus, 93 percent of those eligible for SMI only were less than 75 years of age compared to 60 percent of those covered by both programs. Because women are more likely to lack the work credit requirement, they comprised 69 percent of SMI-only eligibles compared with 59 percent of those covered by both programs. By race, SMI-only eligibles had higher proportions of persons of all other races, 17 percent, and persons classified race unknown, 6 percent; for those having both HI and SMI coverage the proportions were 8 and 3 percent, re-

State Buy-in Agreements

At the start of Medicare, 22 States elected to enroll and pay premiums for aged persons who receive cash payments under public assistance programs. Public Law 90–248 extended eligibility effective April 1, 1968, to those who qualify for medical assistance programs. By January 1, 1970, the closing date for requesting this arrangement, 46 States, the District of Columbia, Guam, and the Virgin Islands signed buy-in agreements. No additional States or areas have obtained buy-in coverage since then. However, 27 States and two areas had extended such coverage to aged medical indigents eligible for medical assistance (title 19). The medically indigent have income and assets larger than those required for public assistance but inadequate to pay their medical expenses. There were 3 million aged buy-ins ever enrolled during 1974, or 12 percent of all SMI enrollees. Data for July 1, 1974, by State, as previous years have shown, indicate that the highest proportions of buy-ins were in Alabama, Arkansas, Georgia, Mississippi, South Carolina, and Texas (table H).

Persons Terminated

Since coverage ends in the month after death, terminations in 1974 include deaths from December 1973 through November 1974. During 1974, coverage was terminated for 1,236,000 persons who died (table J).

The death rate per 1,000 HI enrollees differed little by race. The death rate for whites was below that of minority races at all age ranges except those 80 years and over.

Age	Deaths of HI enrollees per 1,000 enrolled for HI	
	White	All other races
All persons	55.6	55.4
65–69	25.7	32.1
70–74	38.7	44.9
75–79	59.5	63.8
80–84	93.0	89.5
85 and over	168.7	133.5

[1] State of residence is not necessarily State that bought coverage.
[2] Data for these areas are combined to prevent disclosure of confidential information.

Over 1,234,000 aged persons were terminated from SMI in 1974, 97 percent as a result of death. Only 29,000 of the 21.4 million aged persons enrolled for SMI withdrew from the program either by notifying the Social Security Administration or by not paying the premium. All but 3 percent of the terminations for white persons were a result of death. Ninety-two percent of the terminations for all other races resulted from death and the remaining 8 percent withdrew.

Premium-HI Coverage

Effective July 1, 1973, the 1972 social security amendments permitted aged persons who are ineligible for HI to enroll voluntarily by paying a monthly HI premium. Eligibility for persons 65 and over requires only that enrollees be citizens or aliens residing permanently in the United States for the past 5 years. The HI premium was set at $33 a month for a 12-month period beginning July 1973. It increased to $36 beginning July 1, 1974. This amount represents the *full* cost of hospital coverage. In addition, these premium-HI enrollees must also enroll for SMI if they had not already done so. This requirement reduces the possibility of excess usage of the more costly HI services if the enrollee was not covered by SMI.

During 1974, there were 15,350 people enrolled for premium-HI coverage. Women made up 76 percent of those enrolled. By race nearly 84 percent of these enrollees were white, only 5 percent were of all other races, and for 10 percent race was not known. Over 2 out of 5 premium-HI enrollees were aged 65 and 66. The distribution of persons enrolled for premium-HI during 1974 by race and sex is:

Race and sex	Premium-HI enrollees	
	Number	Percentage distribution
Total	15,350	100.0
Men	3,624	23.6
Women	11,726	76.4
White	12,936	84.3
Men	3,123	20.4
Women	9,813	63.9
All other races	817	5.3
Men	213	1.4
Women	604	3.9
Race unknown	1,597	10.4
Men	288	1.9
Women	1,309	8.5

ENROLLMENT GROWTH OF THE AGED, 1966–74

Both HI and SMI enrollment have increased in each of the 8 years of the Medicare program. Enrollment in the HI program grew from 19.1 million in 1966 to 22.0 million in 1974, because persons aging into the program exceeded enrollees that died. SMI enrollment grew from 17.7 million in 1966 to 21.4 million in 1974. Nearly all persons 65 years and over are entitled to HI, while persons voluntarily enroll for SMI and must pay a premium. These factors account for differences in the size and the rate of growth of the two programs. Annual changes in HI enrollment were less than 3 percent (table K), and SMI enrollment changes ranged from 1 to 5 percent (table L). The increase in SMI enrollment from 1 percent between 1966 and 1967 to 5 percent between 1967 and 1968 was caused by the first general enrollment period which took effect on July 1, 1968. Until 1973, SMI enrollment increased 2 percent annually. Between 1972 and 1973 SMI enrollment increased 3 percent, reflecting the removal of the 3-year limit for enrollment during the 1973 general enrollment period.

TABLE J.—Persons 65 years and over whose health insurance was terminated during 1974 by race, sex, and reason for termination

Race and sex	Terminations by death			Other supplementary medical insurance terminations
	Hospital and/or medical insurance	Hospital insurance	Supplementary medical insurance	
All persons	1,235,732	1,228,619	1,194,399	40,012
Men	622,633	619,283	598,173	22,344
Women	613,099	609,336	596,226	17,668
White	1,096,867	1,091,414	1,063,071	30,169
Men	556,455	553,765	536,418	16,859
Women	540,412	537,649	526,653	13,310
All other races	101,540	100,387	95,219	7,998
Men	53,590	53,128	49,678	4,692
Women	47,950	47,259	45,541	3,306
Race unknown	37,325	36,818	36,109	1,845
Men	12,588	12,390	12,077	793
Women	24,737	24,428	24,032	1,052

Hospital Insurance

The sex distribution of the Medicare population changed slightly in the first 8 years of the program. Between 1966 and 1974 the increase in HI enrollees was greater for women (19 percent) than for men (11 percent). As a result, the proportion of women to total enrollees increased slightly, as shown below:

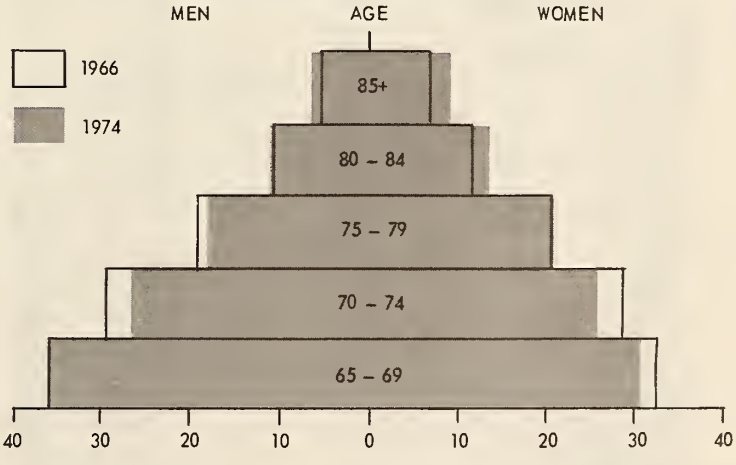
Year	Men	Women
1966	42.6	57.4
1967	42.3	57.7
1968	42.1	58.0
1969	42.0	58.0
1970	41.8	58.2
1971	41.6	58.4
1972	41.4	58.6
1973	41.3	58.7
1974	40.9	59.1

This change reflected primarily the relative growth in the number of women in the group aged 75 and over. Among those entitled to HI benefits in that group, the proportion that were women went from 60.1 percent to 63.5 percent, as shown by the following figures:

Year	Age and sex			
	Under 75		75 and over	
	Men	Women	Men	Women
1966	44.2	55.8	39.9	60.1
1967	44.0	56.0	39.4	60.6
1968	44.0	56.0	39.1	60.9
1969	44.1	55.9	38.7	61.3
1970	44.1	55.9	38.2	61.8
1971	44.1	55.9	37.9	62.1
1972	44.1	55.9	37.4	62.6
1973	44.2	55.8	37.1	62.9
1974	43.9	56.1	36.5	63.5

The 15-percent growth in enrollment in the 8-year period varied by age and sex (figure 1). The proportion of women aged 80–84, and 85 and over increased from 1966 to 1974, decreased for ages 65–69 and 70–74, and remained unchanged for ages 75–79. Among men, the proportion in age groups 65–69, 80–84, and 85 and over increased while those aged 70–74 and 75–79 decreased. These changes in the age distribution raised the proportion of persons aged 75 and over to the total HI population from 37 percent in 1966 to 40 percent in 1974. And the change in the distribution of men and women aged 75 years and older in the first 8 years of the program increased the HI enrollment of women by 31 percent, more than double the increase in that of men (table K).

Figure 1.—Percentage distribution of hospital insurance Medicare enrollees, by age and sex, 1966 and 1974



Though enrollment of aged persons of all other races has increased at a faster rate than among whites, changes in the racial composition of the enrolled population have been small. Specifically, the proportion of enrollees other than white was 7.6 percent in 1966 and 8.2 percent in 1974. The percentage distribution of enrollment by race follows:

Year	All persons	White	All other races	Race unknown
1966	100.0	89.3	7.6	3.1
1967	100.0	89.2	7.7	3.1
1968	100.0	89.2	7.7	3.1
1969	100.0	89.2	7.8	3.0
1970	100.0	89.3	7.9	2.8
1971	100.0	89.6	8.1	2.4
1972	100.0	89.6	8.0	2.3
1973	100.0	89.2	8.2	2.6
1974	100.0	89.1	8.2	2.7

[1] Enrollment as of October 1.
[2] Consists of 50 States, the District of Columbia, and residence unknown.

The greater longevity of women was again evident as the increase in enrollment among women was much larger than that of men for both white persons and those of all other races.

Changes in enrollment by geographic region depend not only on the number of persons aging into the program and the number of deaths among those aged 65 and over, but also on interstate migration of Medicare enrollees. Nearly 2 percent of all persons 65 years and over migrate between regions in a year, chiefly from the Northeast and North Central States to the South.[3]

All four regions showed annual increases from 1966 to 1974 in the number of persons entitled to HI benefits. The South had the largest numerical growth (1.3 million) and

[1] Consists of 50 States, District of Columbia, and residence unknown.

the highest relative increase (24 percent). Next was the West with an enrollment gain of 620,000 or 22 percent. The North Central and Northeastern States each had an increase of 8 percent. These differences in enrollment growth during the period reported raised the South above the North Central States as the most populous region among persons aged 65 and over beginning in 1968.

Enrollment increased also in each of the 50 States between 1966 and 1974. The largest numerical rise was in Florida (422,000), accounting for nearly one-third of the total growth of enrollment in the South. Much of Florida's growth probably came from the migration of the elderly from the Northeast and North Central States.[4] Ranking next in numerical growth between 1966 and 1974 were: California, 324,000; Texas, 208,000; Pennsylvania, 115,000; New York, 96,000; and North Carolina, 94,000. These six States represented 43 percent of the increase in HI enrollment between 1966 and 1974, but accounted for only 37 percent of the HI population in 1974. The District of Columbia had a 3-percent decline in enrollment, probably caused by the migration of the elderly.[5] The Bureau of the Census also reported that for all persons 65 years and over the District of Columbia had a net outmigration between 1965 and 1970.[6] A distribution of the 50 States and the District of Columbia by percentage changes in enrollment between 1966 and 1974 is shown below:

Percentage change in enrollment, 1966–74	Number of States [1]	
	Hospital insurance	Supplementary medical insurance

70.0 to 74.9	—	1

[1] Includes District of Columbia.

Migration of persons 65 years and over may be seen by comparing enrollment in counties that, according to the Bureau of the Census, have experienced large net inmigration or outmigration between the 1960 and 1970 censuses. The migration of persons 65 years and over to metropolitan resort or retirement areas as reported by the Bureau of the Census is reflected in the large increases (24 to 114 percent) in HI enollment between 1966 and 1974 in the nine counties in Arizona, California, Florida, New Jersey, and New York shown below. Enrollment in counties with sizable outmigration indicates that the movement of migrants is primarily from large metropolitan counties in the Northeast and North Central States. In 8 years, changes in HI enroll-

[4] William J. Nelson, "Interstate Migration of Aged Beneficiaries," Social Security Administration, Office of Research and Statistics, *Research and Statistics Note No. 3*, February 25, 1970. The study refers only to those aged social security beneficiaries receiving benefits on June 30, 1967. Unpublished tables for beneficiaries receiving benefits on June 30, 1970, June 30, 1971, and June 30, 1972, show similar trends.

[1] Counties with more than 15,000 migrants 65 years and over as measured by the 1960 and 1970 census. Source; Donald E. Starsinic, "Geographic and Age Differentials in Population Growth, 1960–70," Proceedings of the 14th National Meeting of the Public Health Conference on Records and Statistics (Washington, D.C.: U.S. Government Printing Office, 1973).

Most of the increase in the HI population between 1966 and 1974 occurred in metropolitan counties (table K). In revising standard metropolitan statistical areas, the Office of Management and Budget classified many nonmetropolitan counties to metropolitan counties without central cities. These revisions, effective in 1973, account for most of the changes in enrollment in these counties.

Changes in SMI Enrollment

The annual increase in SMI enrollment (table L) generally exceeded that of HI (table K). As a result, for the 1966–74 period, SMI enrollment grew by nearly 1.3 times that of HI.

The higher rate of growth of SMI enrollment was reflected in the increased proportion of the HI population also enrolled in SMI. This percentage rose from 92.8 percent in 1966 to 96.1 percent in 1974 (table M). The proportion declined in 1967 because there was no general enrollment period. The ratio increased in 1968 and again in 1969 but remained virtually unchanged until 1973. The large affirmative response during the 1973 general enrollment period accounted for the increase in 1973 in the SMI participation rate.

When Medicare began, the proportion of the HI population also enrolled in SMI was 93.4 percent among white persons and 87.4 percent among persons of all other races, a difference of 6.0 percentage points. In 1967, SMI enrollment among whites increased while enrollment for all other races fell; as a result the difference in the proportion of the HI population also enrolled in SMI widened to 9.5 percentage points.

Except for 1972 the growth of SMI enrollment among all other races has exceeded that of whites, so that the difference in participation rates by race has narrowed to 5 percentage points.

Regional differences in the proportion of HI enrollees also participating in SMI have declined since 1968. The figures in 1974 ranged from 97.5 percent in the Northeast and North Central States to 96.8 in the South.

The participation rate among women continued to be a little above that for men.

HI ENROLLMENT OF THE DISABLED

Disability beneficiaries are eligible for Medicare either because they were entitled to 24 consecutive months of cash disability insurance benefits or because they had end-stage renal disease and met the entitlement provisions of section 299I of the 1972 amendments. On July 1, 1974, there were 1.9 million disability beneficiaries enrolled for Medicare (table N), an increase of 11 percent over the previous year.

To receive disability insurance benefits under the social security program, persons must be unable to do any substantial gainful work due to medically determined physical

[1] Represents persons eligible solely because of ESRD under Section 299I of the 1972 social security amendments.

or mental impairments which can be expected to result in death or have lasted or can be expected to last for a continuous period of at least 12 months. There are three types of disability insurance beneficiaries entitled to Medicare:

(1) Disabled workers with sufficient quarters of coverage to be currently or fully insured under social security;
(2) Persons disabled in childhood—prior to age 22—who are dependents of retired, disabled, or deceased beneficiaries; and
(3) Disabled widows or widowers of beneficiaries.

Medicare coverage for the disabled is limited to those who have been entitled to disability benefits for at least 24 consecutive months. In addition, persons under age 65 with end-stage renal disease requiring dialysis or kidney transplantation are deemed disabled and thus entitled to Medicare if they:

(1) Are currently or fully insured,
(2) Are entitled to monthly social security or railroad retirement benefits, or
(3) Are spouses or dependent children of such insured or entitled persons.

Type of Beneficiary

The largest group of disability beneficiaries enrolled in HI were 1,530,000 disabled workers who accounted for 79 percent of all enrollees. The remainder were 310,000 adults disabled as children, 78,000 disabled widows and widowers, and 10,000 beneficiaries with end-stage renal disease (ESRD). The sex distribution of these four groups differed significantly. Men comprised 70 percent of disabled workers, reflecting their greater participation in the labor force, while more than half of persons disabled in childhood and those entitled because of ESRD were men. Among disabled widows and widowers, less than 1 percent were men.

The proportion of persons classified as white ranged from 70 percent among ESRD enrollees to 86 percent among adults disabled in childhood. A relatively higher proportion of disability beneficiaries eligible for Medicare were minority race members than was true in the general population aged 20–64. The proportions were 15 and 12 percent respectively.[7] The distribution of disability beneficiaries by type of beneficiary, race, and sex for 1974 is:

Race and sex	All disability beneficiaries	Workers	Children	Widows and widowers	End-stage renal disease only
All persons:					
Number	1,928 116	1,529.663	309 942	78 430	10.081

[7] U.S. Bureau of the Census, *Current Population Reports*, "Estimates of the Population of the United States, by Age, Sex, and Race: April 1, 1960, to July 1, 1973," P–25, No. 519 (Washington, D.C.: U.S. Government Printing Office, April 1974).

The age of the four types of beneficiaries differed markedly as expected. Under Medicare, disabled workers, children, and widows cannot exceed age 64 because their disability benefits automatically become retirement benefits when they attain age 65. However, beneficiaries with ESRD continue their Medicare entitlement after attaining age 65 because of their earlier eligibility. The highest median age was among disabled widows, 60.5 years, because Medicare coverage for this group is limited to those 52–64 years of age. The lowest median age, 38.6 years, was among those disabled in childhood.

The median age of all disabled men was 1 year less than that of women. The greatest difference in median age by sex was 2.5 years among those disabled in childhood. Differences in median age by race were small among disabled workers, widows, and ESRD beneficiaries. However, whites disabled in childhood were 6.2 years older on the average than those of all other races. The median age of all disability beneficiaries covered by Medicare, 55 years. was much older than the median age of 39 years of the U.S. population 20–64 years.[8] The median age of disability beneficiaries, by type of beneficiary, race, and sex, is as follows:

Race and sex	Median age				
	All disability beneficiaries	Workers	Children	Widows and widowers	End-stage renal disease only
All persons	55.3	56.7	38.6	60.5	43.0
Men	54.9	56.3	37.4	61.1	42.5
Women	55.9	57.3	39.9	60.5	43.7
White	55.4	56.8	39.0	60.5	43.3
Men	55.0	56.5	37.9	61.2	42.8
Women	55.9	57.4	40.3	60.5	44.0
All other races	54.5	55.6	32.8	60.0	42.3
Men	53.5	54.9	32.4	60.7	42.0
Women	56.0	57.0	33.3	60.0	42.6

The proportion of all disability beneficiaries increased in each successive 10-year age group (table N). This was true for both sexes and both racial groups. Among all disabled persons there were more men than women in every age group, again reflecting the higher participation of men in the labor force.

More than half of all disability beneficiaries—both men and women as well as whites—were 55 to 64 years old, the age span during which the prevalence of chronic diseases increases sharply.[9] This had important implications for the Medicare program, both in terms of quantity of medical services used and related costs.

Geographic Distribution

By region, the distribution of disability beneficiaries covered by HI varied from 16 percent in the West to 37 percent in the South (table O). Nearly the same proportion of disability beneficiaries, 17–18 percent, lived in three geographic divisions: the South Atlantic, Middle Atlantic, and East North Central States. Among disabled beneficiaries of minority races, 52 percent, lived in the South, while the lowest proportion, 13 percent, lived in the West.

Pacific	239	12.7	13.1	11.5	100.0	85.3	13.5

[1] Includes race unknown not shown separately.

Whites represented between 85 and 92 percent of all disability beneficiaries enrolled for HI in all geographic divisions but the South. In the geographic divisions of the South, whites accounted for between 76 and 79 percent of disabled HI enrollees.

The distribution of disability beneficiaries by metropolitan-nonmetropolitan county of residence was similar to that of the aged. Nearly two-thirds of the disabled enrolled for HI lived in metropolitan counties. By geographic division the Middle Atlantic States had the highest proportion, 83 percent, living in metropolitan counties while only 42 percent lived in such counties in the East South Central States. Of those disabled living in metropolitan counties nearly three-fourths of them were located in standard metropolitan statistical areas with 500,000 or more population in 1970 (table 2.9). The distribution by area of residence and type of county for 1974 is:

Census region and division	All disabled persons	Metropolitan counties		Nonmetropolitan counties
		With central city	Without central city	
United States	100.0	51.2	14.0	33.5
Northeast	100.0	58.7	23.2	17.0
New England	100.0	57.1	19.9	22.3
Middle Atlantic	100.0	59.2	24.2	15.5
North Central	100.0	49.2	13.8	35.8
East North Central	100.0	55.5	15.1	28.4
West North Central	100.0	33.3	10.7	54.5
South	100.0	39.9	12.2	46.9
South Atlantic	100.0	41.0	13.3	44.7
East South Central	100.0	30.9	11.6	56.5
West South Central	100.0	45.8	10.8	42.7
West	100.0	70.9	6.1	22.4
Mountain	100.0	49.0	5.0	44.9
Pacific	100.0	77.1	6.4	16.0

For the United States there were 15 disabled enrollees per 1,000 population aged 18 to 64. Above average rates were found in the the South, with the highest rate, 22 per 1,000 persons, in the East South Central States. The lowest rate was 11 per 1,000 in the West North Central. Variation in the ratio of enrollees to the population 18–64 years old was greater by State. The highest rate was 32 per 1,000 population in West Virginia and the lowest was 5 per 1,000 in Alaska. The number of disability beneficiaries per 1,000 population aged 18–64 by census region and division is:

Census region and division	Total population 18–64 (in thousands)[1]	Disability beneficiaries entitled to health insurance	
		Number	Number per 1,000 aged 18–64
United States	122,313	1,878,627	15.4

[1] U.S. Bureau of the Census, *Current Population Reports*, "Estimates of the Population of States by Age, July 1, 1973 and 1974," P–25, No. 539 (Washington, D.C.: U.S. Government Printing Office, January 1975).

Beneficiaries With End-Stage Renal Disease

For persons with end-stage renal disease, the basis of their eligibility was determined as of April 1, 1975, the date SSA records were summarized. As reflected in SSA records, there were 10,081 persons under age 65 entitled to Medicare on July 1, 1974, solely because they had ESRD and met the insured status requirements (table P). For such persons eligibility for Medicare coverage begins with the third month after the month in which a course of dialysis begins. Eligibility may begin before completing this qualifying dialysis period for ESRD beneficiaries receiving kidney transplants without starting dialysis or receiving dialysis in preparation for transplantation. Excluded from the count of those solely eligible because of ESRD were about 6,135 persons with ESRD who were "dually" entitled to Medicare on July 1, 1974, because they met both the insured status requirements and were entitled to at least 24 consecutive months of disability insurance benefits.

Persons eligible because of ESRD who are receiving dialysis are not entitled to disability insurance benefits if

45–54	95.1	94.0	96.3	96.2	95.7	96.8	91.2	88.8	93.8
55–64	96.4	95.7	97.2	96.9	96.7	97.1	93.2	91.1	96.0

they are able to work. However, because of the high cost of treatment these persons are also covered by Medicare if they meet the insured status requirements. By July 1, 1974, a year after ESRD eligibility began, claims for Medicare coverage were denied to over 1,000 persons with ESRD because they failed to meet the insured status requirements.

ESRD Beneficiaries By Age, Race, and Sex

The median age of persons entitled solely because of ESRD was 43.0 years. The median age of women with ESRD was 1.2 years more than that of men. By race the average age of whites was 43.3 years or 1 year more than persons of all other races. For both sexes, the number of ESRD beneficiaries increased in each successive age group and peaked at ages 45–54.

By race, 70 percent of ESRD enrollees were classified as white, 23 percent were members of all other races, and for 7 percent race was unknown. There were slightly more men than women for both racial groups.

The characteristics of beneficiaries who were dually entitled to Medicare because they were entitled to disability benefits and had ESRD differed from those eligible solely because of ESRD. The dually entitled were older; 59 percent were aged 45 and over compared with 46 percent for those entitled solely because of ESRD. By sex, 66 percent of the dually entitled were men while the proportion of men among those solely eligible because of ESRD was 54 percent. The distribution of those persons with ESRD eligible for Medicare because they were entitled to at least 24 consecutive months of disability benefits and because they met the insured status requirements by age, sex, and race is:

Age, sex, and race	Disability beneficiaries with ESRD [1]	
	Number	Percent
Total	6,135	100.0
Age:		
Under 15	4	.1
15–24	273	4.4
25–34	1,049	17.1
35–44	1,177	19.2
45–54	1,766	28.8
55–64	1,866	30.4
Sex:		
Men	4,073	66.4
Women	2,062	33.6
Race:		
White	4,381	71.4
All other races	1,685	27.5
Race unknown	69	1.1

[1] Excludes beneficiaries with end-stage renal disease eligible for Medicare solely because of Section 299I, the Social Security Amendments of 1972.

SMI ENROLLMENT OF THE DISABLED

The proportion of disabled HI beneficiaries enrolled in SMI was 90.5 percent on July 1, 1974, about the same as it was a year earlier. The comparable rate for aged enrollees as of July 1, 1974, was somewhat higher, 96.1 percent. Even the proportion of SMI enrollment when Medicare began on July 1, 1966, was higher—92.9 percent.[10]

The relatively high proportion of veterans among disability beneficiaries may explain the lower SMI participation

[10] Social Security Administration, Office of Research and Statistics, *Medicare: Health Insurance for the Aged, 1966, Section 2: Enrollment* (Washington, D.C.: U.S. Government Printing Office, 1969).

rate. Veterans, especially those with severe disabilities, may have declined SMI enrollment because it requires a monthly premium, and they may be entitled to free medical care from the Veterans Administration.

Evidence of the number of disabled veterans covered by Medicare is found in the Current Medicare Survey of the disabled. This survey reported on the utilization of medical services in the second half of 1971 by disability insurance beneficiaries who would have met the eligibility requirements of the 1972 amendments. Of the estimated 16.6 million covered medical services used by those disabled, 3.9 million or nearly 25 percent of them were provided by the Veterans Administration and the Armed Forces.[11]

Type of Beneficiary

The largest variation in the HI disabled population enrolled for SMI was by type of entitlement. The lowest proportion was among disabled workers, 90.2 percent (table Q) while the highest, as expected, was among those with ESRD, 95.0 percent. Most persons with ESRD are expected to enroll in SMI since most of their expenses for maintenance dialysis are covered by SMI rather than HI. However, the participation rate for these enrollees fell by 3.3 percentage points from July 1, 1973.

By age, disabled workers under 35 showed the lowest proportion with SMI coverage (86.8 percent); this proportion increased slightly for ascending 5-year age intervals, and was highest (93.1 percent) at ages 60–64 years. There was little variation in rates by age for persons eligible solely because of end-stage renal disease. The rates ranged from 94.3 percent for those with ESRD under age 35 to 97.1 at ages 60–64.

TABLE Q.—Percent of disability beneficiaries enrolled in the hospital insurance program participating in the medical insurance program, by type of entitlement, sex, race, and age, July 1, 1974

Sex, race, and age	Workers	Children	Widows and widowers	End-stage renal disease [1]
All persons	90.2	91.0	93.5	95.0
Sex:				
Men	89.2	90.3	92.9	94.6
Women	92.6	91.8	93.5	95.5
Race:				
White	89.9	90.9	93.4	95.8
All other races	91.6	91.4	93.4	91.7
Unknown	91.8	93.5	96.2	97.9
Age:				
Under 35	86.8	89.2	0	94.3

55–59	90.5	93.8	92.8	95.8
60–64	93.1	94.5	94.2	97.1

[1] Represents persons eligible solely because of ESRD under Section 299I of the 1972 social security amendments.

[11] Helen C. Chase, "Use of Medical Services by Disability Beneficiaries, July–December 1971," *Health Insurance Statistics*, CMS–29, December 30, 1974.

Age, Race, Sex and Residence

Among disabled women, the SMI enrollment rate was 92.6 percent, or over 3 percentage points higher than that of disabled men. Higher rates for women were found in every age group with somewhat larger differences in those groups which were likely to have relatively large numbers of veterans. The higher participation rate of women beneficiaries occurred mainly among disabled workers as there was almost no difference in rates by sex among childhood disability and ESRD beneficiaries.

TABLE R.—Percent of disability beneficiaries in the hospital insurance program participating in the medical insurance program, by age, race, and sex, July 1, 1974

Race and sex	Under age 65	Under 35	35–44	45–54	55–59	60–64
All persons	90.5	88.3	88.7	88.8	90.9	93.2
Men	89.3	87.3	87.7	87.5	89.6	92.4
Women	92.6	90.2	90.6	91.5	92.9	94.6
White	90.2	88.0	88.4	88.4	90.5	93.1
Men	89.0	86.9	87.4	87.0	89.2	92.2
Women	92.4	89.9	90.3	91.2	92.7	94.6
All other races	91.6	90.2	90.3	90.6	92.3	93.5
Men	90.6	89.7	89.6	89.4	91.1	92.5
Women	93.6	91.3	92.0	93.0	94.1	95.0
Race unknown	92.8	86.3	88.2	92.3	93.5	95.2
Men	92.3	78.8	81.6	91.4	93.4	95.4
Women	93.7	92.0	93.3	93.9	93.6	94.7

Persons of races other than white had slightly higher participation rates than whites in every age and sex group. The rate of HI eligibles enrolled in SMI was lowest in New England (89.5 perecnt) and highest in the East South Central States (94.2 percent). In every geographic division the SMI enrollment rate of women exceeded that of men (table S).

DISABLED PERSONS NEWLY ENROLLED AND TERMINATED IN 1974

A total of 399,000 disabled persons were newly enrolled for HI between January 1–December 1, 1974 (table T). Nearly one-third were 60–64 years old. Additions to the SMI rolls may exceed the number of persons newly enrolled for HI because of State buy-ins. By the end of 1974, about 340,000 disability beneficiaries were enrolled for SMI under the buy-in program in 46 States, the District of Columbia, Guam, and the Virgin Islands (table H).

Persons Terminated

During 1974, almost 218,000 disability beneficiaries were terminated for HI coverage (table U). More than half of these terminations were transfers from the disability program to the retirement program of persons who had attained age 65. The remainder were 76,000 terminations because of death and 18,500 who lost their Medicare coverage because of recovery. Recovery means the person either no longer meets the medical standards for disability or had demonstrated, despite an impairment, an ability to engage in substantial gainful activity.

[1] Includes terminations for other reasons not shown separately.

DEFINITIONS

The HIMA file: The data on age, sex, race, and place of residence of the enrolled population in this report are from the health insurance master (HIMA) record file. Changes or corrections in the characteristics of the beneficiaries, new enrollments, and terminations are entered into the file daily. Data for 1974 are from the HIMA record file summarized on April 1, 1975.

Place of residence: The beneficiary's place of residence is defined as his mailing address. This mailing address is not necessarily his actual place of residence. For example, some beneficiaries have their checks mailed to a bank, a post office, or to a representative payee in a State or county which may differ from the residence of the beneficiary. Temporary or permanent changes in address are shown as enrollees report them to SSA. Only the current mailing address is kept in the HIMA record file and that address is classified as the place of residence. The address in the file on the date of tabulation is used for all tables.

Residence unknown: There were 23,000 aged and 9,700 disabled persons with unknown residence recorded in the HIMA record file in 1974 (tables 2.6 and 2.11). Most of these entries for the aged were the result of processing errors with respect to codes for States or foreign countries. Most of the disabled were the result of temporary enrollment records being established for those entitled to benefits because they had end-stage renal disease. In addition, the number of enrollees whose residence was unknown may be calculated from tables 2.3 and 2.9 for each region and division.

Race unknown: On July 1, 1974, the number of aged HI enrollees without a race designation was over 586,000, 19,000 more than the previous year. There were 38,000 disabled persons (primarily RRB beneficiaries) whose race was not known on July 1, 1974. The relatively high proportion of RRB enrollees without a race designation is due to data exchange procedures which do not contain a race designation. Changes in HI enrollment by type of entitlement among aged persons classified as race unknown between 1973 and 1974 are shown below:

(In thousands)

Type of entitlement	HI enrollment		Increase, 1973–74
	1973	1974	
Total aged race unknown [1].	567	586	19
Entitled to RRB	229	269	40
Entitled to social security	266	251	—15
Other enrolled persons	143	134	—9

[1] Persons entitled to social security and railroad retirement benefits are counted in each category separately, but only once in total.

Persons enrolled as of the mid-period of 1974: Enrollment as of July 1 has been chosen as the population base for utilization rates to be published in other sections of the Medicare data series. The choice was based on the similarity of July 1 enrollment to a 12-month average enrollment. A comparison of aged HI enrollment by age, race, and sex on July 1, 1974, with an average of 12 monthly enrollment figures in 1974, computed from table 2.5, showed remarkable similarity. Less satisfactory was SMI enrollment for July, which was consistently higher than the 12-month average enrollment. This difference resulted from additions to the rolls on July 1 of persons who requested coverage during the general enrollment period. However, deriving a monthly average enrollment from a fixed date of tabulation involves a possible understatement of the number enrolled since enrollment data are less complete in the months closest to the date of tabulation. The difference between the July 1 figure and the true monthly average may be less than that observed in the present data.

PROVISIONS OF THE LAW AND REGULATIONS

THE MEDICARE program, enacted on July 30, 1965 as Title XVIII of the Social Security Act, became effective on July 1, 1966. In 1972 major changes were made in the program's provisions by Public Law 92–603 enacted October 30, 1972. The name of the Medicare program was officially changed to Health Insurance for the Aged and Disabled.[1] Effective July 1, 1973, Medicare coverage was extended to disabled beneficiaries under the social security or railroad retirement programs, and to persons under age 65 who require dialysis or a kidney transplant for end-stage renal disease.

The program makes available two separate but complementary insurance programs—hospital insurance, covering nearly all persons age 65 and over and disabled beneficiaries under age 65 entitled to benefits for at least 24 consecutive months, and covered workers and their dependents with end-stage renal disease who require renal dialysis or a kidney transplant; and supplementary medical insurance, covering those persons who voluntarily pay the premiums. Beginning July 1973, most persons age 65 or over otherwise ineligible for hospital insurance may enroll voluntarily and pay the premiums for hospital coverage if they are enrolled for supplementary medical insurance.

HOSPITAL INSURANCE PROGRAM

The hospital insurance (HI) program pays for part of the costs of inpatient hospital care and related health care services provided by skilled nursing facilities (formerly termed extended-care facilities) and home health agencies following a period of hospitalization. For the services to be covered, they must be provided by institutions and organizations which have been certified as qualified providers of services and which have signed an agreement to participate in the program.[2] An exception exists under special provisions for hospitals certified to provide only emergency services.

Benefits

The law provides limits on services which may be covered under the HI program. These limits are based on the concept of a "benefit period." A benefit period begins with the first day of hospitalization and ends when the individual has not been a bed patient in a hospital or skilled nursing facilitiy for 60 consecutive days.

The law also established cost sharing by the individual through deductible and coinsurance payments. The Secretary of Health, Education, and Welfare is required each year to determine the deductible amount, by a formula, specified by law, which is based on the average per diem rate for inpatient services furnished beneficiaries during the preceding calendar year. The deductible amount tends to approximate the current cost of 1 day in a hospital. The coinsurance amount for hospital inpatient care is set at one-fourth of the deductible, for lifetime reserve days at one-half of the deductible, and for skilled nursing facility services at one-eighth of the deductible.

Inpatient hospital benefits.—Covered hospital services include room and board in accommodations containing from two to four beds, nursing services (except for private duty nursing), drugs and biologicals, and other services ordinarily furnished by a hospital to its inpatients.

The program does not cover the services of physicians (including staff radiologists, anesthesiologists, pathologists and physiatrists) except for services provided by interns or residents under approved teaching programs.

The program pays for the "reasonable costs," of covered services in a participating hospital for up to 90 days in a benefit period. Full payment is made for the first 60 days of hospitalization less the deductible of $84 for services received in benefit periods starting in 1974. For each of the remaining 30 days in the benefit period, the patient pays a coinsurance amount of $21 a day (one-fourth of the deductible).

Each hospital insurance beneficiary also has a "lifetime reserve" of 60 additional hospital days which can be used at his option whenever he has exhausted the 90 days covered in a benefit period. Lifetime reserve days are subject to a copayment of $42 a day (one-half of the deductible).

The cost of the first three pints of blood (or equivalent amounts of packed red blood cells) furnished a patient during a benefit period is also deductible unless the patient arranges for replacement. Charges for any additional blood are covered under the program as are charges for blood administation, storage, etc.

The program also pays for emergency services in a nonparticipating hospital. Each nonparticipating hospital providing emergency services may elect to claim payments from the Medicare program for emergency services rendered beneficiaries in a given year. If the hospital elects this option, reimbursement is made as described above. If the hospital elects not to bill the program, the beneficiary claims direct payment and submits the itemized bill to the Social Security Administration. In this case reimbursement is based on reasonable charges for covered services and amounts to 60 percent of reasonable charges for room and board plus 80 percent of such charges for ancillary services. Payment is

[1] For a description of the provisions of the Social Security Act as amended through January 4, 1975, see *The Social Security Act*, Committee on Finance, U.S. Senate, 94th Congress, 1st Session.

subject to the deductible and coinsurance provisions of the law.

Hospital insurance benefits also include reimbursement for inpatient tuberculosis and psychiatric hospital services. However, there is a lifetime limit of 190 days of care in a psychiatric hospital. When a person in a participating psychiatric hospital becomes entitled to hospital insurance, the number of days he was such an inpatient in the 150-day period prior to his eligibility is deducted from his days of entitlement to inpatient psychiatric care in that benefit period, but not from the lifetime limitation.

Hospital insurance benefits have been extended to cover payments for inpatient services furnished by a foreign hospital, if it is closer to or more accessible to the beneficiary's residence than a U.S. hospital. For benefits to be payable the beneficiary must be a U.S. resident and the foreign hospital must be accredited by, or have standards equivalent to, the Joint Commission on Accreditation of Hospitals (JCAH).

Skilled nursing facility benefits.—Covered extended-care services furnished by a skilled nursing facility include nursing care; room and board; physical, occupational or speech therapy; drugs and biologicals; medical services of an intern or resident-in-training of a hospital having a transfer agreement with the skilled nursing facility; and other necessary health care services generally provided by such facilities.

The program pays for the reasonable costs of all covered inpatient services in participating skilled nursing facilities for up to 100 days in a benefit period. Benefits are payable only following discharge from a hospital after a stay of 3 consecutive days or more; generally the admission to the facility must occur within 14 days of hospital discharge. However, a period of up to 28 days after discharge from a hospital is permitted when the patient's medical condition or shortage of beds affect the admission date. Full payment is made for the first 20 days. For each of the remaining 80 days, the patient pays a coinsurance amount of $10.50 a day (one-eighth of the inpatient hospital deductible) as required by law.

For extended-care services to be covered, a physician must certify that the patient needs daily skilled nursing care or skilled rehabilitation services and must order the services. The 1972 amendments include a provision for advance approval of extended-care services, whereby the Secretary of HEW establishes, by medical condition, when a patient will require skilled nursing care services after hospitalization. Accordingly, a patient's physician may certify the need for a skilled nursing facility and submit a plan, in advance of admission, as to the type of services to be provided. The plan will be presumed to be the type of care covered as a skilled nursing facility.

Post-hospital home health benefits.—Covered home health services may include part-time or intermittent nursing care; physical, occupational or speech therapy; part-time or intermittent services of a home health aide; medical supplies (other than drugs and biologicals) and the use of medical appliances; and, in certain cases, services of an intern or resident-in-training of a teaching hospital. The services must be furnished by or under arrangements of an approved home health agency.

Coverage under HI provides for payment of the reasonable cost of up to 100 home health visits after the beginning of one benefit period and before the beginning of the next. In addition, the visits must occur within a year following a beneficiary's most recent discharge from a hospital stay of at least 3 consecutive days or from a covered stay in a skilled nursing facility. The home health services must be necessary for further treatment of a condition for which the patient received services in the hospital or skilled nursing facility. A home health plan must be established by the patient's physician within 14 days after the hospital or skilled nursing facility discharge. The 1972 amendments include a provision for advance approval of home health coverage similar to that provided for skilled nursing care services.

SUPPLEMENTARY MEDICAL INSURANCE PROGRAM

The supplementary medical insurance (SMI) program provides coverage for a variety of medical services and supplies furnished by physicians or others in connection with physicians' services; outpatient hospital services; and home health services. Individuals participate voluntarily in the program. Premiums are paid by or on behalf of all enrollees, and are matched by the Federal Government from general revenues.

Benefits

Physicians' services covered under the program include visits to the home, office, hospital, and other institutions. The program also pays for other services and supplies, such as drugs and biologicals that cannot be self-administered, if they are furnished as a part of a physician's professional service; diagnostic X-ray tests. diagnostic laboratory tests, and other diagnostic tests, X-rays, radium, and radioactive isotope therapy; splints, casts, and other devices used for reduction of fractures and dislocations; purchase or rental of durable medical equipment; ambulance service; and prosthetic devices that replace all or part of an internal organ. Also provided are home health visits provided by a certified home health agency in accordance with a home health plan established by the patient's physician (no prior hospitalization is necessary). Payment may be made for up to 100 home health visits in a calendar year without regard to similar services received under the HI program.

Also covered are hospital services incident to physicians' services rendered to outpatients, and outpatient speech and physical therapy services. In addition, effective July 1, 1973, the 1972 amendments provide for services of a physical therapist in independent practice furnished in his office or the patient's home, under a physician's plan. Reimbursement would be limited to not more than $100 of incurred expenses in a calendar year.

Some services of a licensed chiropractor are covered. Covered services are limited to treatment by means of manual manipulation of the spine to correct a subluxation demonstrated by X-ray.

In each calendar year through 1972, a $50 deductible had to be satisfied before payment could be made under the SMI program. In 1973, a $60 deductible was set. Bills count to-

ward the deductible on the basis of incurred rather than paid expenses; only charges allowed under the program count toward the deductible. To preclude the possibility of a beneficiary having to meet a deductible twice in a short period of time a "carry-over" provision is applied. Accordingly, covered expenses incurred in the last quarter of the year and applied to the deductible in that year are also credited toward the deductible for the following year.

After the deductible has been met, the SMI program pays for 80 percent of the allowed (reasonable) charges for covered physician services and most other medical services. However, deductible and coinsurance requirements do not apply to the services of radiologists and pathologists furnished to hospital inpatients. "Reasonable" charges for such services are reimbursed.

When an independent laboratory bills patients directly and accepts assignment, the Secretary is authorized to negotiate a payment rate with the laboratory for the diagnostic tests it provides Medicare beneficiaries. Reimbursement on assigned bills is made at 100 percent of the negotiated rate; the deductible and coinsurance requirements do not apply. Hospital services incident to outpatient care, and home health services, are subject to the deductible and are reimbursed on the basis of 80 percent of reasonable costs. However, coinsurance payments for home health services were eliminated after December 1972.

The law sets special limits on the payment which may be made for outpatient treatment of mental illness; recognition of incurred expenses is limited to the lesser of $312.50 or 62.5 percent of actual expenses in a calendar year. Since only 80 percent of allowed charges may be reimbursed, the effect is to limit payment to $250 or 50 percent of the allowed charges in any year after the deductible has been met, whichever is less.

ELIGIBILITY

Hospital Insurance

Almost all persons aged 65 and over are eligible for benefits under the hospital insurance program. Included are those entitled to monthly social security cash benefits or payments from the railroad retirement system. Further, a special transitional provision provides eligibility for certain persons who do not qualify for monthly cash benefits on the basis of their own covered employment or as a dependent or survivor of an insured worker. The provision applies, generally, to a person aged 65 or over who (1) attained age 65 before 1968 or (2) attained age 65 after 1967 with not less than three quarters of social security coverage, whenever acquired, for each calendar year elapsing after 1966 and before the year in which he attains age 65. For persons who reach age 65 after 1968, the amount of work credits (quarters of coverage) needed increases by three quarters each year—six quarters are needed by those who reached age 65 in 1969, nine by those who reached age 65 in 1970 and so on.

Hospital insurance protection under certain circumstances can be retroactive for as many as 12 months before the month an individual files his application for entitlement. For example, an individual may apply 11 months after he attains age 65 and still be entitled to benefits from the month he attained age 65.

Effective July 1, 1973, disabled persons entitled for not less than 24 consecutive months to cash benefits under the social security or railroad retirement programs are eligible for benefits under the hospital insurance program. Those covered include disabled workers under 65 years, disabled widows and disabled dependent widowers between the ages of 50 and 65, women age 50 or older entitled to mother's benefits who for 24 months met requirements for disability benefits but did not file a claim, and disabled beneficiaries aged 18 or over who became disabled before age 22. A person must be disabled for 5 months before disability benefits can begin. Medicare coverage begins with the 30th month after the first full calendar month of disability.

Hospital insurance protection was also extended to persons under age 65 who are currently or fully insured or entitled to monthly social security benefits, and to their spouses or dependent children who have end-stage renal disease and require renal dialysis or a kidney transplant. Eligibility for coverage begins with the 3rd month after a course in renal dialysis begins or before this qualifying dialysis period for ESRD beneficiaries receiving kidney transplants without starting or receiving dialysis in preparation for transplantation. Eligibility ends with the 12th month after the person had a kidney transplant or dialysis was terminated.

The law now permits persons attaining age 65 who are ineligible for hospital insurance either as cash beneficiaries or under the transitional provisions to voluntarily enroll for hospital coverage.

Coverage under this provision was effective July 1, 1973, and the monthly premium set at $33 rose to $36 starting July 1, 1974. This amount represents the full premium cost of hospital insurance. Individuals may enroll in the hospital insurance program only if they enroll in the supplementary medical insurance program. Enrollment periods in 1974 for hospital protection were the same as the initial and general enrollment periods under supplementary medical insurance.

Persons who retired from Federal service after July 1, 1960, and had the opportunity to be covered under the Federal Employees Health Benefits Act of 1959 are ineligible for hospital insurance benefits under the transitional provisions.

Also ineligible are aliens with less than 5 years of continuous residence in the United States, and those persons convicted of crimes against the security of the United States.

Supplementary Medical Insurance

Persons entitled to benefits under the hospital insurance program, retired Federal employees, aliens residing in the United States, and persons not eligible for hospital insurance under the transitional provisions may participate voluntarily in the SMI program. To enroll prior to July 1, 1973, the person must file a written request with the Social Security Administration during specified periods. To prevent loss of entitlement or delay, the 1972 amendments provide for

automatic enrollment in SMI for persons as they become entitled to hospital insurance. An individual may decline SMI enrollment. If he withdraws before his coverage starts, there is no premium liability, nor is he charged with an enrollment.

Individuals may enroll in the SMI program only during the initial and general enrollment periods. The initial enrollment period begins with the third month preceding the one in which an individual is first eligible and ends 3 months after the month of attainment, a total period of 7 months. If he enrolls during the 3 months prior to the month in which he is first eligible, his coverage is effective with the month in which he is first eligible; if he enrolls during the month he is first eligible, his coverage begins the following month; if he enrolls in any of the 3 months after he is first eligible, his coverage begins from 2 to 3 months after enrollment, depending on how long he waited before enrolling.

Beginning with 1969, SMI general enrollment periods are from January 1 through March 31 of each year for those who did not enroll in their initial enrollment period, or who previously terminated their enrollment and wish to re-enroll. A person who enrolls during a general enrollment period is covered under SMI beginning with July 1 of the year in which he enrolls. Prior to the 1972 amendments, an eligible individual had to enroll within 3 years after the end of his initial enrollment period or within 3 years after termination of prior enrollment. The 3-year limitation is no longer applicable. Re-enrollment is allowed only once.

A State may enroll eligible aged and disabled individuals who receive cash payments under State supplementary income or State supplementation programs or are otherwise eligible for medical assistance under Title XIX if: (a) prior to January 1, 1970, the State requested that a State-Federal enrollment agreement be established, and (b) the State pays the necessary premiums.

For a person 65 years and over, enrollment terminates with the beginning of the month following the month of death. For the disabled person, coverage terminates with the end of entitlement to benefits based on disability. For a person with chronic renal disease, coverage ends 12 months after he had a transplant or dialysis treatment ends. Otherwise, social security and railroad retirement beneficiaries may give notice of their desire to withdraw from the SMI program at any time; their coverage is terminated at the close of the following calendar quarter. Other enrolled persons may terminate their coverage by withholding payment of premiums or by notifying the Social Security Administration in writing of their desire to withdraw from the program. The enrollee is provided a 90-day grace period for the payment of overdue premiums after which coverage is automatically terminated. The 1972 amendments extend the 90-day grace period for an additional 90 days when the Secretary finds there is a good cause for failure to pay the premium before the end of the initial 90-day grace period.

FINANCING THE PROGRAM

Hospital Insurance

The hospital insurance program is financed primarily through a schedule of increasing tax rates on a portion of current earnings in employment covered under the Social Security Act. The maximum amount of annual earnings to which the rates are applied began at $6,600 for calendar year 1966; it increased to $7,800 effective with 1968 and $9,000 effective with 1972. The 1972 amendments established an additional schedule of increases to $10,800 for 1973, and $12,000 for 1974 with future automatic increases as wages rise.

The same tax rate applies to employees, employers, and self-employed persons. The rate has been 0.60 percent for each year 1968–72. The scheduled rate for 1973 through 1977 is 1.00 percent, and rates increase for future years up to 1.45 percent for 1986 and thereafter. The proceeds of this tax, and monies collected from the railroad retirement system (with respect to the coverage of railroad retirement beneficiaries) are placed in the Federal hospital insurance trust fund from which reimbursement for all benefits and administrative expenses incurred under the hospital insurance program is made. The hospital insurance trust fund is reimbursed from general tax revenues for the cost of providing coverage for the persons who qualify for hospital insurance under the transitional provisions. Amounts paid for hospital insurance coverage by persons voluntarily paying the premiums are deposited in the hospital insurance trust fund.

Supplementary Medical Insurance

Premiums are paid into the Federal supplementary medical insurance trust fund by those persons enrolled for supplementary medical insurance (or on their behalf), and a matching amount is paid by the Federal Government from general revenues. Benefits and administrative costs are paid from monies in the SMI trust fund.

The premiums of persons receiving social security cash benefits, railroad retirement, or Federal civil service annuities are deducted from their monthly benefit checks. Persons not receiving monthly benefits are billed quarterly for premiums by the Social Security Administration or the Railroad Retirement Board and have a 90-day grace period in which to make payment. A person is given an additional 90 days to pay the premium when the Secretary finds there is good cause for failure to pay the premium before the end of the initial 90-day grace period. Premiums may be paid for as long as a year in advance. For individuals financially unable to make quarterly payments, arrangements can be made for monthly payments.

Amount of premium.—The Secretary of HEW is directed by law to determine the SMI premium rate on an annual basis. The dollar amount is required to be sufficient to produce revenue equal to one-half of the expected benefit and administrative costs payable under SMI during the period for which the premium rate applies. The rate is determined in December of each year and is applicable for 12 months beginning with the following July. The monthly rate was $6.30 beginning July 1973, and increased to $6.70 on July 1974. After July 1973, the premium rate will increase only in the event of a general cash benefit increase—either an

automatic increase resulting from an increase in prices or a general social security benefit increase enacted by Congress. The percentage increase in the premium in any given year may not exceed the percentage increase in cash benefits.

ADMINISTRATION OF THE PROGRAM

Hospital Insurance

Under the HI program, groups or associations of providers, on behalf of their members, may nominate a national, State, or other public or private agency or organization to serve as an intermediary in the claims process. A member of an association is free, however, to receive payment from an approved intermediary other than its association's nominee, if approved by the Secretary and agreeable to the intermediary selected. In addition, a provider may deal directly with the Social Security Administration.

The Secretary may enter into an agreement with a nominated organization if he finds this to be consistent with effective and efficient administration of the hospital insurance program. Under the agreement, the intermediary determines the provider's reasonable costs for items and services covered under the program; makes payment; and assists in the application of safeguards against unnecessary utilization of covered services. The agreement may also call for (1) furnishing consultative services to assist providers to establish and maintain necessary fiscal records and otherwise qualify as providers of services; (2) serving as a center for communicating with providers; and (3) making audits of provider records. Hospital insurance intermediaries also make payments for home health and outpatient hospital services covered under medical insurance.

Under the law, the reasonable costs of services are determined pursuant to regulations established by the Secretary of HEW. These regulations prescribe the method(s) used to determine costs and the items to be included; they take into account both direct and indirect patient care costs.[3]

Requests for Medicare payment for covered services generally are submitted by the provider of services; they must be signed by the beneficiary (or someone for him, if he is unable to do so). The provider is reimbursed on the basis of reasonable costs of covered services and bills the beneficiary for deductible and coinsurance amounts as well as for services not covered by the program.

In some instances, hospitals may bill the program on a physician's behalf for services rendered to inpatients. In these cases, payment is made by the HI intermediary. For this type of billing, funds are transferred from the SMI trust fund to the HI trust fund to cover the cost of these services.

The intermediary selected by the provider reviews claims for payment and pays the provider. Actual payment for individual claims is made on the basis of an interim rate established between the provider and the intermediary. Final settlement for each provider's operating year is made on the basis of a cost report submitted by the provider, and subject to an independent audit.

No payment can be made to Federal facilities except for emergency services, unless the provider serves as a community institution. In addition, payment cannot be made to a provider for those services it is obligated to render at public expense under Federal law or contract.

Supplementary Medical Insurance

Under the SMI program, the Secretary of HEW may enter into contracts with carriers for the performance of specified administrative functions. The carrier's principal function is to determine whether charges are allowable (reasonable) and to make payment. Carriers also have the authority and responsibility to determine, in a given case, whether a claim is for a covered service and to deny claims for noncovered or excluded items or services. In addition, carriers are to assist in applying safeguards against unnecessary use of services.

The allowable charge, on which the Medicare SMI payment is based, may not exceed the lowest of (1) the physician's or supplier's customary charge for the services, (2) the prevailing charges in the locality for similar services, (3) the charge applicable for comparable services under comparable circumstances to the policyholders or subscribers of the carrier.

Allowable charges are updated annually to take into account the actual charges physicians and suppliers have billed for covered services in the preceding calendar year. The revised allowable charge levels go into effect on July 1 of each year or as soon thereafter as they can be incorporated into the carrier's payment system. Thus, for the 12-month period beginning July 1, 1973, allowable charge levels were calculated from actual charge levels for calendar year 1972. However, allowable charges could not exceed the upper limit of the prevailing charges set by law at the 75th percentile of customary charges (weighted by frequency) made for similar services.

Claims for payment of SMI benefits may be submitted to the carrier either by the patient or by the physician or other supplier of services. If the patient submits a claim (an itemized bill) directly to the carrier, he receives direct payment of benefits for covered services; he remains responsible for the physician's (or supplier's) bill. The patient may assign the payment for benefits to a physician or other supplier of services who is willing to accept assignment. In this case, the physician (or supplier) agrees that the allowed or reasonable charge determined by the carrier is the total charge. The physician (or supplier) submits the bill and is reimbursed. In this situation, the patient remains responsible for the remaining 20 percent of the allowed charges for covered services and the $60 deductible (effective 1973), if applicable to the current bill.

Services furnished by group-practice prepayment plans (GPPP's) to members are normally rendered in return for predetermined premium payments. In these cases Medicare reimbursement is made directly to the GPPP. A GPPP which exercises the option provided by law to be paid 80 percent of the reasonable cost of services (in lieu of 80 per-

[3] For details see Code of Federal Regulations, Title 20, Chapter III, Part 405, Subpart D.

cent of the allowed charge for such services) generally deals directly with the Social Security Administration. Plans which choose to be paid on the basis of allowed charges are reimbursed by the SMI carrier.

For bills incurred in the SMI portion of the program after March 1968, claims must be filed no later than the close of the calendar year following the year in which the services are furnished. For services provided during the last 3 months of the calendar year, bills may be submitted through the end of the second year following.

HEALTH MAINTENANCE ORGANIZATIONS

The 1972 amendments provided that individuals eligible for both HI and SMI or for SMI only can choose to have their covered health care provided through a Health Maintenance Organization (HMO). An HMO is an organization which provides to enrolled individuals, either directly or by arrangement with others, comprehensive health services on the basis of a predetermined periodic rate without regard to the frequency or extent of services furnished to a particular enrollee. For Medicare purposes, an HMO must provide all the available services and benefits covered under hospital insurance and medical insurance.

At present, group-practice prepayment plans providing comprehensive health services on a prepaid capitation basis cannot be reimbursed by Medicare through a capitation rate which would constitute a single payment for all covered services furnished to their beneficiary enrollees. Instead, prepayment plans are reimbursed under Medicare on a capitation basis only for the costs of providing physician's and related services.

Reimbursement for inpatient care in a hospital, extended-care services, or home health services is made separately on a cost basis to the provider of the service which may, of course, be an integral part of the group-practice prepayment plan.

GENERAL TABLES

NOTES

Health insurance for the aged and disabled: The program, commonly known as Medicare, that pays for part of the costs of hospital and medical services for participating persons aged 65 and over and disability beneficiaries under age 65.

End-stage renal disease: Persons eligible solely on the basis of end-stage renal disease (ESRD) includes those under 65 years old eligible under the Social Security Amendments of 1972, Section 299I of Public Law 92–603. Although the law refers to chronic renal disease, the term end-stage is generally used as it is more appropriate to describe that stage of renal impairment which cannot be favorably influenced by conservative management alone, and requires dialysis and/or kidney transplantation to maintain life or health.

Type of coverage: The program provides two types of insurance: A basic hospital insurance plan and a voluntary supplementary medical insurance plan.

Persons ever enrolled: All persons eligible for benefits at any time during 1974.

Personal characteristics:

Age: In completed years at last birthday on the reference month of the table for persons alive on December 31, 1974. For persons dying during the year, in completed years on the date of death.

Race: White, all other races, or unknown as entered into the Health Insurance Master record file from basic records completed by the primary beneficiary. Race unknown, whether or not specifically indicated in a table, is included in the "all persons" or equivalent totals. Race is shown for an SMSA if at least 10 percent of enrollees in the area covered under the hospital insurance program were enrollees of all other races.

Sex. As designated in the HIMA record file.

Geographic classifications: Based on the address to which the enrollee's cash benefit check is being mailed or the mailing address recorded in the HIMA record file on April 1, 1975, regardless of the reference date of the table.

All areas: Consists of the United States, Guam, Puerto Rico, Virgin Islands, other outlying areas, and foreign countries.

United States: Consists of the 50 States, the District of Columbia and residence unknown.

Other outlying areas: Consists of American Samoa, the Canal Zone, Canton Island, Caroline Islands, Mariana Islands, Marshall Islands, Midway Islands, and Wake Island.

County: The primary divisions of the 50 States are counties. In Louisiana, however, divisions are called parishes. Alaska is divided into 21 economic areas, shown here as the equivalent of counties. A number of cities that are independent of county organizations are reported separately in Maryland, Missouri, Nevada, and Virginia. In Puerto Rico, divisions are called municipios.

County unknown: Persons whose mailing address does not permit identification of county of residence are included in figures for States, but not in figures for metropolitan and nonmetropolitan counties, or for SMSA's with one exception. Where there is only one type of county in a State, figures for county unknown are assigned to that type.

Metropolitan and nonmetropolitan counties: The division of counties into metropolitan and nonmetropolitan groups is based on the list of standard metropolitan statistical areas (SMSA) as published by the Statistical Policy Division under the direction of the Office of Management and Budget.[1] Except in New England, each SMSA includes a county that contains a central city of at least 50,000 inhabitants based on the 1970 census. In addition, contiguous counties are included in the SMSA if they meet certain criteria of economic and social integration with the central city. In New England, an SMSA consists of towns and cities, rather than counties. However, the mailing address in the HIMA record file is coded only for State and county. Therefore, for New England, the SMSA was replaced by the metropolitan State economic area, which is defined in terms of whole counties. Metropolitan counties are those counties that are included in an SMSA or a metropolitan State economic area. These counties are further divided into those with a central city and those without a central city. Nonmetropolitan counties are those that fall into neither an SMSA nor a metropolitan SEA

SMSA, metropolitan SEA: See above. Only areas in the United States are listed.
